

# Associate Professor Greg Restall

## Associate Professor in Philosophy at the University of Melbourne

### Qualifications

BSc, Hons (Mathematics, 1989), PhD (Philosophy, 1994), both from University of Queensland

### Type of work

Greg teaches and does research in philosophical logic and issues related to language, meaning and metaphysics.

### Science and Faith

Greg is interested in many issues around philosophy and religion. One topic dear to his heart is the nature of rationality and reasoning, and the roles that different kinds of argument and explanation play in belief and unbelief.

### Topics to present

- What's so special about Darwin, Freud, Marx and Nietzsche?
- What arguments and reasoning can do, what they can't do, and why.
- Other topics in philosophy, science and religion, by negotiation.
