

Patsy (Patricia) Robertson

Qualifications

MBChB
FRANZCR
MMed (Imaging)
GCUT

Professional Career

Consultant radiologist in a busy public hospital, interpreting plain films, MRI, ultrasound, CT and mammography, performing image guided diagnostic and therapeutic procedures. Senior Fellow, Radiology Department, The University of Melbourne, teaching radiology trainees, medical students and postgraduate physiotherapy students. Research activities in the area of MRI in arthritis, cartilage and Gaucher disease.

Interests in the science faith area

My Christian faith was challenged, particularly by aspects of biological science, during my medical training and at work, so that being able to listen to and encourage those working in this area has been important.

Within ISCAST I have the following roles: convenor of the Communications Working Group of ISCAST; associate editor of *Christian Perspectives on Science and Technology – ISCAST Online Journal*; member of the ISCAST Victorian Branch Committee; co-opted member of the ISCAST national Board.

Professional Associations

ISCAST, Fellow (2009)
Royal Australasian College of Radiologists, Fellow
Journal of Medical Imaging and Radiation Oncology, Associate Editor
Australian Musculoskeletal Imaging Group
Australian Medical Association
Christian Medical and Dental Fellowship of Australia
